JOB SUMMARY

You would generally be working on large commercial, industrial or housing sites throughout South Wales and on occasions in South West England, travelling to site in company vehicles. We do not undertake any domestic landscaping work for private individuals. Our landscape contracts are typically associated with new commercial buildings, roads or reclamation sites, or they involve carrying out environmental improvements to established town centre, residential or industrial areas. In addition to maintaining schemes that we have put in place our grounds maintenance teams are responsible for maintaining a large number of housing association sites.

As a Landscape Operative you would be responsible for carrying out a wide range of manual landscaping duties under the guidance and direct supervision of your Foreman. Whilst you will generally be working with others you will at times need to work under your own initiative without close supervision. The work is physically demanding and you would be working outside in all weathers.

We have teams that undertake hard landscape works, soft landscape works and grounds maintenance operations. We will try to accommodate any preference that you may have for instance to work with our hard landscape teams. The contracts that we undertake are very varied and the industry seasonal by nature and so you are likely to be involved in all aspects of landscape work.
