

## Radyr Local Park Improvements, Cardiff

This project was designed by Cardiff County Council Landscape Architects, we successfully tendered for the works which comprised the installation of a One on One basketball court, creation of a natural grass junior kick about area, associated seating and cycle park.

The basketball area was built up with 200mm of type1 and two layers of tarmacadam.

The excavation works were carried out using our own 1.5 tonne excavator which features expanding tracks for added stability during grading works. Surplus spoil was landscaped adjacent.

The area was edged with precast concrete kerbs. The tarmacing works were carried out by our own staff with tarmac collected using our 7 tonne Mercedes tipper lorry.

This use of our own plant and equipment allows us to be competitive and flexible on smaller contracts without any reliance on subcontractors.

This contract was completed by one of our 3 man landscape teams in 6 days.
