

## Wales Millennium Centre, Cardiff Bay.

When you see Wales Millennium Centre you will see that it can only have been designed and built in Wales. The brief to the architects, Percy Thomas, was that it had to be “unmistakably Welsh and internationally outstanding”.

Overlooking the waterfront at Cardiff Bay, the Wales Millennium Centre plays host to an international showcase of musicals, opera, dance and ballet.

The Centre includes a world-class lyric theatre seating up to 1,900 spectators, a Studio Theatre, Dance Studio, main concourse, residential accommodation, rehearsal halls, recording studios and a variety of bars and restaurants.

Landscape works required us to undertake topsoiling works, tree pit preparation, the supply and planting of semi-mature trees and the laying off high quality turf. Access was very restricted and we were required to meet a very tight deadline which we successfully achieved.

Upon completion the works were maintained for a period of 12 months.

Client	Contract Summary	Landscape Consultant
